VTX-3

KREEPY KRAULY CLEAN AND COMPACT.

With the VTX-3, we've taken the same Vortex Cleaning Technology of our top of the range VTX-7 model and condensed it. The VTX-3 still has a triple cleaning action, however it has a smaller main body and pipes making it ideal for compact pools.

Don't let its small size fool you. VTX-3 creates a powerful vacuum to remove difficult sand and debris whilst scrubbing the pool. The Ultra Flex Hose and Steering System enables it to criss-cross your pool to ensure maximum cleaning and coverage is achieved every time.

VORTEX POWER FOR A DEEPER CLEAN

The powerful Vortex generates a vacuum that sucks up debris and creates a gentle scrubbing action to remove algae and calcium build up.

The VTX-3 difference

TRIPLE CLEAN WITH VORTEX ACTION

Sucks VTX-3 creates a powerful vortex vacuum that sucks up all debris in its path to achieve a complete clean.

Scrubs The Scrubbing Seal gently loosens calcium, algae and dirt build up so it can easily be vacuumed up.

Skims The Mini-Skim regulates the amount of suction needed and uses the excess vortex vacuum to pull floating debris into the skimmer box, for a top to bottom clean.

ENTIRE POOL COVERAGE

The Ultra Flex Hose and Steering System create a Crisscross Cleaning Pattern to allow the VTX-3 to move freely and optimise coverage.

LIGHT TO MEDIUM DEBRIS REMOVAL

The Side Leaf Scoops allow the VTX-3 to capture and remove light to medium leaf loads without interrupting its clean.

UNBEATABLE WARRANTIES

VTX-3 is built to last. It's covered by a massive 10-year Warranty on the Flow Drive – its single moving part, and a 1-year Full System Warranty. Plus, you have the back up of local service and support.

SAVE ENERGY AND MONEY

Zero extra running cost on single speed pumps and compatible with lower speed settings on variable speed pumps.

See our website for more details.

VTX-3 is suitable for all pool material types. Its Crisscross Cleaning Pattern is best suited to compact pools with curved walls.
