Introducing the new AutoChlor™ CHROME Series

Proudly Australian designed and manufactured by AIS

AutoChlor™ CHROME delivers great value for money and includes as standard features:

- **Reverse Polarity (RP) technology** - meaning the chlorinator periodically switches between positive and negative charge resulting in less calcium build up and less maintenance.
- **Circuit breaker** - designed to protect your pool system in the event of a power surge or overload.
- **Pump output socket** - 240 volt supplied to synchronise your chlorinator and pool pump.
- **Warning indicator lights** - for easy and safe operation.
- **Chlorine controller and output indicator**
- **Genuine AIS Anodes**

Why choose a CHROME Salt water chlorinator?

- Latest water disinfection technology
- Affordable, quality system
- Contemporary good looks
- Easy to order, install, operate and maintain
- Convectional cooling technology which allows air flow through the unit with an Ingress Protection (IP) 24 rating.
- Can be fitted to new pools or retro-fitted to existing pools
- Made by the same company that makes AutoChlor™, one of Australia's leading salt water commercial chlorinators. AutoChlor™ technology is used in aquatic centres and theme parks and luxury resorts and hotels worldwide.

An affordable, quality salt water pool chlorinator featuring the latest in advanced water disinfection technology - AIS' AutoChlor™ CHROME.

The new CHROME is an inline, salt water chlorine generator for residential pools. CHROME is designed for the customer who demands the latest in technology, superior performance and contemporary good looks at an affordable price. It is perfect for first home buyers or investors.

Proudly Australian designed and manufactured, CHROME's superior design takes all the guess work out of keeping your pool water clean, clear and safe leaving you more time to do the things you love.

Its easy to read control panel automatically tells when salt levels are lower or higher than desired. Chlorine output can then be increased or decreased with the simple turn of a dial ensuring optimum efficiency and a safer swimming environment.

CHROME is brought to you by the award-winning Australian Innovative Systems (AIS) - a leader in water disinfection technology. In realising CHROME, AIS has drawn on its 20+ years of industry experience and renowned, commercial water disinfection technology (AutoChlor™) to arrive at a compact and clever residential chlorinator perfect for salt water pools with an average salt concentration of 5,000ppm (generally the average home salt water swimming pool).
