

# Aquatight digital solar controllers

Make an Aquatight controller the heart of your solar pool heating system.

- Maximises heating capacity
- Easy operation
- Australian made
- Superior digital technology
- 3 year warranty

The V2 Deluxe for all solar installations

For long life and high performance

# Aquatight Digital Solar Controllers

## All V2 & V7 models have the following features:

- **Auto sampling** - automatically monitors water temperature to ensure maximum heat gain.
- **Winter mode** - for off-season maintenance - runs system briefly same time each day in winter to maintain equipment efficiency.
- **Solar lock-out** - automatically limits the pool being overheated.
- **Tropical mode** - Allows the cooling of overheated water in tropical regions.
- **Digital temperature sensors** - Unequaled accuracy, reliability and life-span.
- **Self diagnostic program** - will diagnose, identify and locate faults within your system for easy corrections and repair.
- **Battery back-up** - will maintain all settings for seamless operation in the event of a power failure or power surge.
- **Australian made** - manufactured to the highest standards for Australian conditions.

## Latest technology with the simplest of operation:

The V7 is the ideal choice for retro-fitted systems or simply when a little more sophistication is required.

- Easy to operate
- Programmable, multi-function time clock
- Solar priority for maximum heating efficiency
- Automatic winter mode
- Auxiliary heater interlock (optional)
- Manual pool pump over-ride

## Models also available with wireless roof sensors

V2RR Deluxe is available with a battery powered wireless roof sensor that simplifies installation and eliminates broken wiring.

V7RR is available with solar powered wireless roof sensor. Tropical mode not available with this option

## Models available for control of electric heat pumps

### H7 HEAT CONTROL

- Programmable heating start and end times
- Multi function time clock
- Chlorinator lockout (optional)
- Adjustable sample times
- Auxiliary heater interlock - (optional)
- Manual pump override

Ask your heating specialist, pool builder or pool shop about the large range of pool heating control products for Heat Pumps, Gas and Solar integration.
