

Perfect Pool Water All Year Round

The Worlds Smartest Fully Automatic
Chlorine & pH Control System

AutoChem
ULTIMATE SERIES

Safe & Healthy Water

For Pools & Spas 365 Days a Year

The Autochem "Ultimate" is a fully automatic water pool management system that ensures perfect healthy water for your family and saves you time and money.

Autochem will operate on any pool or spa - no matter what type or size. It automatically delivers the exact amount of chemicals to perfectly control your chlorine and pH levels - even in heavy use periods.

When initially installed, the current date is entered into the memory of the Autochem so that the unit will automatically know how long your pool pump should operate for Summer and Winter seasons.

The Ultimate Series incorporates warning systems to tell you when to refill chemical drums, or if there is any malfunction or a service is required. It will even tell you how and how long to backwash your filter for the very best results.

The Autochem Ultimate is exceptionally user friendly, very easy to install and incorporates a timeclock to control you entire filtration system.

At last - a low maintenance and convenient way of maintaining chlorine & pH levels at all times, automatically.

The Benefits

1. Automatically and continually tests chlorine & pH levels.
2. Visual & audible alarm system.
3. Automatic Summer/Winter modes.
4. Set & forget operation.
5. Heavy duty "Peristaltic" pumps for reliable and efficient operation.
6. No over-feeding of chemicals.
7. Ensures correct backwash and waste operation of filter for best results.
8. Suitable for fresh or salt water pools.
9. Three year pro rata warranty on probes and 12 months warranty on control unit.
10. Automatically adjusts for heavy bathing loads.
11. Easy to install - fittings can be before or after the pool pump.
