The ultimate in salt water management

Gemini

The Gemini Series

The Gemini System is a fully-controlled salt water management system. Pool water sanitiser and pH levels are continually analysed by the Gemini Control unit, which activates the Gemini salt or mineral salt chlorinator as required and also keeps pH within the optimum range.

- Maintains safe & healthy pool water
- Fully automatic sanitiser & pH control
- Reduces pool operating costs including power, chemical & equipment replacement
- Low maintenance costs, reduction in chemical usage & reduced power consumption provides overall year round savings
- Makes it easy to maintain correct pool water chemistry
- Compatible with conventional and mineral salt pools & spas

Gemini

Gemini - is a fully-controlled salt water management system. A multi-electrode probe analyses water chemistry and determines how much chlorine needs to be produced by the electrolytic cell. The probe also assesses the pH of the water and adjusts as necessary.

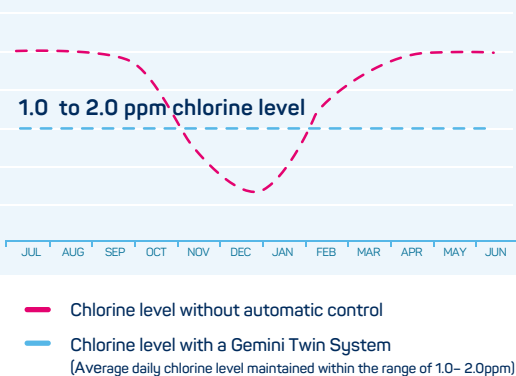

- *Maximise energy efficiency, saving you dollars*
- *Constantly maintains your pool water chemistry at safe levels*
- *Prevents damage to pool shell & equipment caused by incorrect water chemistry*
